- **Quality and reliability**

PRODUCT DESCRIPTION

Compressed air drives the piston in both directions. The cylinder transmits the force to the actuator shaft.

APPLICATIONS

Actuation of industrial valves and actuators.

TECHNICAL SPECIFICATIONS

Standard supply pressure: 6 bar.

Working medium: compressed air.

Stroke and bore: according to valve and order.

Other pressures: consult VAYCOM.

MATERIALS AND CONFIGURATION

Barrel: aluminium.

Piston rod: stainless steel.

End caps: aluminium-colour aluminium. Material depends on the bore and configuration.

Mounting and coupling: according to the valve. Align to avoid side loads where stated.

ACCESSORIES AND OPTIONS

Position sensors, solenoid valve or positioner according to order.
